

# WP1 – Management of the project

**Carlo Guaraldo**

Collaboration Committee Meeting - LNF, 4 September 2009

# HADRONPHYSICS2 MANAGERIAL STRUCTURE

# Project Coordinator and Management Board

## PROJECT COORDINATOR

- Carlo Guaraldo                      INFN-LNF, Italy

## MANAGEMENT BOARD

- Guenther Rosner                      *Glasgow, United Kingdom*
- Fabienne Kunne                      *CEA-IRFU, France*
- Mauro Anselmino                      *INFN-Torino and Univ., Italy*
- Helmut Koch                      *Bochum, Germany*
- James Ritman                      *Bochum and Juelich, Germany*
- Tord Johansson                      *Uppsala, Sweden*
- Christian Kuhn                      *CNRS/IN2P3/IPHC, France*
- Eugenio Nappi                      *INFN-Bari, Italy*
- Mihai Petrovici                      *IFIN-HH, Romania*

# Management Team

- The Project Coordinator is assisted by a team composed of:
  - a personal assistant *Yara Maria Bravo*
  - a financial assistant *Diana Laura Sirghi*
  - a web-master *Giuliano Basso*

## Main aim of the activity

- To grant an efficient and accountable way of managing the project through effective management and decision-making structures, while retaining a high level of representation and transparency, both with regard to the scientific and the financial aspects.

# Actions to be carried out

1. **Organizational activities**
2. **Actions undertaken to disseminate, promote and exploit the knowledge connected to and derived from the project**

# 1. Organizational activities

- contacts with the activities' spokespersons
- contacts with the beneficiaries of the GA
- contacts with NuPECC
- contacts with the European Commission
- contacts with the community
- implementation, formal constitution, entering into force of the managerial bodies
- organization of the periodical meetings of the managerial bodies
- preparation of the periodic reports

## 2. Dissemination of knowledge: main objectives are visibility and recruitment

- to achieve **visibility** for the project and its findings across Europe and worldwide, both **within and outside the scientific community**
- to **recruit and encourage the next generation of scientists**

## 2. Dissemination of knowledge: tools

- presentation of the project to International Conferences and Workshops, NuPECC, seminars, etc.
- co-sponsorships of International Conferences and Workshops
- organic cooperation with European Centers of excellence in the hadron physics field
- promotion of actions within the individual organizations to publicize research activities and the knowledge derived from the project
- implementation of the project website ([www.hadronphysics2.eu](http://www.hadronphysics2.eu))
- ...
